

CONFIRMATION

CE designation

Window Sill technical construction registration

Lottman Fensterbänke GmbH located in A-4462 Reichraming Austria, hereby confirms that window sills **are NOT subject to any CE registration requirements**, as no European Standards or any European Technical Guidelines (EADs) have been produced.

Window sills in Austria are not designated as a building product, so there is no legal Austrian Standard for these products, and therefore no legal requirement for them to be registered.

Window sills in Germany are classified as a construction product included in the MVV TB (Technical Building Regulations) D 2.2, number 2.2.2.4. These products are of minor importance within construction regulations. No usability or compliance certificates are therefore required for these products, and no conformity labels are necessary.
